Security to students,
Peace of mind to parents

School Bus Tracking System

School bus tracking system is one of the module of Zeroerp school management software. It is an important feature for school's to provide better security for students and staff. It is a location tracking system through GPS tracker equipment or through mobile GPS System. It is to track safety and location of children during their movement through vehicle from school to anywhere at any time.

Your Happiness Our Goal

It is the safest method to communicate with bus drivers and to locate vehicle during an emergency. Many of the Education Institutes have already adopted this system for the protection of their children.

Zeroerp [school management software](#) is a full-fledged software with multiple features from data base management of school, notification, chat, GPS Tracking of vehicle, Review Log, multilingual software with an Android and IOS App.
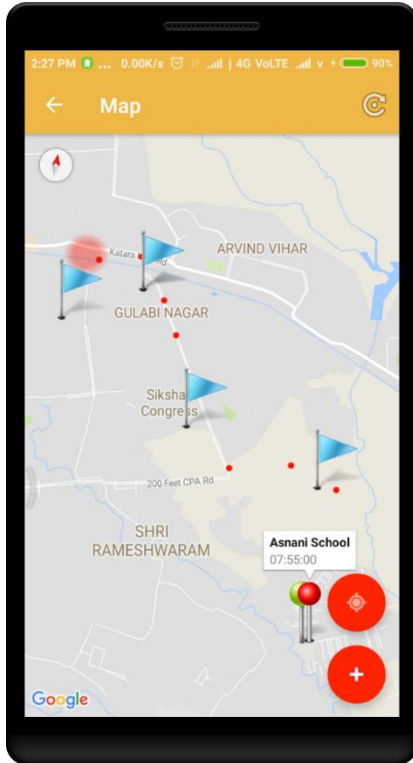

[School Bus Tracker](#) is one of the important module of this software. Some of the benefits of this module are-

BENEFITS

- **Real time tracking**: Track your bus real-time on web.
- **Route display**: Bus Route is displayed on app and web
- **Geo-tagging**: Each bus stop is marked on map to know bus position relative to school stops.
- **Alert to Parents**: Parents of the wards get alerts for pick-up and drop when school bus is reaching their respective stop.
- **Alert on undefined Path**- Parents and administrator will receive an alert if bus deviates from its path.
